Payment Plans for FD Service Fees

You may make as many small payments as needed provided the balance is paid by September 30th. However, Cahaba Valley Fire & EMR District offers a payment plan option for property owners who cannot pay the assessment balance in full by September 30th for the billing year.

Working Procedure

- Payment plans must be requested by the property owner before September 30th by contacting the Business Office to set up a payment plan agreement.
- The payment plan agreement must be agreed to and signed by the property owner.
- A rebilling fee will be added to the account in October, but once all agreed-upon payments are made on time, it will be reversed if the payment plan is set up before September 30th.
- Payments will be calculated by taking the balance due and dividing it by the number of payment periods remaining through April 30th of the billing year.
- Any non-whole amounts are added to the first period of the payment plan with the remaining periods being equal amounts for the remainder of the payment plan.
- All payments must be made before April 30th of the billing year to prevent a carryover balance to the following year.
